SUMMARY

Aspiring Business Intelligence Analyst currently pursuing an MS in Data Science. Holds experience transforming fragmented sales and operations data into standardized reporting, KPI dashboards, and actionable insights. Skilled in R, SQL, Python, Shiny, and Salesforce, with a strong foundation in data storytelling, process documentation, and cross-functional collaboration. Bilingual (JP/EN) and known for attention to detail, analytical curiosity, and supporting teams through reliable data stewardship and insight-driven decision-making.

EDUCATION

- Willamette University/ School of Computing & Information Sciences** | Salem, OR Aug 2025 - (*Expected*) Aug 2026
- Pursuing 3+1 BS/MS Data Science Dual Degree (GPA: 4.00)
 - Academic Honors Fall 2025, Spring 2026
 - Relevant Courses: Data Visualization, Fundamentals/Advanced Data Engineering, Applied/Advanced Machine Learning, Python for Data Science, Data Ethics, Privacy and Humans
- Willamette University/ College of Arts and Sciences** | Salem, OR Aug 2022 - May 2026
- Pursuing 3+1 BS/MS Data Science Dual Degree / Minor in Economics. (GPA: 3.99)
 - Honors: Phi Beta Kappa, Summa Cum Laude, Academic Honors every semester from Fall 2022 through Spring 2026
 - Relevant Courses: Managing with AI, Intro to Data Science with R, Inferential Statistics with R, Intro to Programming with Python, Math for Data Science, Research in Data Science, Statistical Engineering, Multivariable Calculus
-

SKILLS

- Japanese Fluency, Python, SQL, R, Microsoft Office, Google Workspace, Generative AI tools (ChatGPT, Claude), Open AI Playground, Shiny, Grafana, Apache Airflow, dbt, Tableau, Power BI (familiar), Salesforce, Looker, Process Documentation
-

PROFESSIONAL EXPERIENCE

- Operation Intern & Enrollment Operation Intern**, Willamette University Admissions Office | Salem, OR Sep 2023 - Present
- Managed data stewardship for the CAS Slate CRM database, including executing daily queries, consolidating records, and performing over 700 GPA calculation checks
 - Surfacing preliminary patterns in deposit activity linked to hold decision timing by conducting EDA in R and SQL (Slate), with descriptive and correlation analysis underway across a project structured with a formal proposal, WBS, RACI chart, and two stakeholder review checkpoints.
 - Improved data retrieval processes and increased system flexibility by transforming existing queries into configurable joins using SQL, contributing to a large-scale data migration project over the summer
 - Preserved 8 years of institutional history by migrating 2,000+ law school applications (2017–2025) into the graduate database through a cross-database join, supporting data and document retention compliance
- Sales Operations Analyst Intern**, OpenSesame | Remote June 2025 - April 2026
- Developed a leadership-facing variance dashboard in Excel for the 2026 funnel model with dynamic formulas and interactive filters, reducing reporting time by 2hrs/week and enabling real-time performance tracking for more informed executive decision-making
 - Informed 2025 new-business forecasting by delivering four Time-in-Stage analyses (Opp→Close, MQL→SAL) covering 18 months, prototyping the modeling workflow in R Markdown
 - Increased Salesforce account data accuracy by web-scraping Forbes' G2000 with Python (pandas, rapidfuzz) and fuzzy-matching 2,000 companies utilizing OpenAI API, correcting 2025 Fortune/G2000 status for territory planning
 - Drove 91 meeting bookings (37% of 245 inbound leads) by auditing 100 stalled "4-hour" leads to surface funnel-drop patterns, informing an updated Gong Engage flow
 - Enabled real-time Partner team goal tracking by creating Looker dashboards using SQL to centralize KPIs for leadership reviews
-

DATA PROJECTS

- Data Analyst – Financial & Operational Analytics**, Airline Delays | Salem, OR Oct 2025 - Dec 2025
- Identified late aircraft and carrier delays as the primary operational cost drivers across major U.S. airlines by analyzing 170K+ DOT records using Python (pandas, NumPy, LASSO, multiple linear regression), demonstrating that delays follow complex behavioral patterns rather than simple predictors
 - Surfaced the absence of a statistically significant link between delay metrics and stock valuation by integrating operational data with 5-year airline stock prices, challenging a common assumption and delivering a business-relevant conclusion for investors and operators
- Sports Analytics Analyst**, Willamette University Soccer Analytics (WUSA) | Salem, OR Aug 2024 - Dec 2024
- Developed end-to-end data pipelines in R to collect, clean, and structure Willamette Men's soccer match data, enabling high-resolution analysis of team and opponent performance trends for the coaching staff
 - Designed and deployed an interactive Shiny dashboard integrating season-long and opponent-level analytics, giving coaching staff real-time access to tactical insights throughout the season
